

**Amendments to the Claims:**

This listing of claims replaces all prior versions and listings of claims in the application:

1-15. (Cancelled)

16. (Currently Amended) An aqueous phytopathological formulation comprising:

~~—~~ a hydrosoluble salt of at least one aminophosphate- or aminophosphonate-class herbicide;

~~—~~ at least one principal surfactant ~~selected from alkylbetaines and alkyl(amidoalkyl)betaines~~ comprising an alkylbetaine; and

~~—~~ at least one additive ~~being an alkylmonoglycoside or~~ comprising an alkylpolyglycoside.

17. (Currently Amended) The formulation ~~according to~~ of claim 16, wherein the herbicide ~~is~~ comprises a hydrosoluble salt of N-phosphonomethyl glycine.

18. (Currently Amended) The formulation ~~according to~~ of claim 16, wherein the amount of herbicide presents a content of between 80 and 510 g/l, ranges from 80 to 510 g/L, expressed in acid herbicide equivalents.

19. (Currently Amended) The formulation ~~according to~~ of claim 16, wherein the principal surfactant ~~corresponds to~~ comprises one or more of the following compounds of formulae:

wherein:

$R^1$  represents a linear or branched alkyl group **containing having** 3 to 30 carbon atoms;

$R^2$ , which are identical or different, represent an alkyl radical; and

$R^3$  represents a hydrogen atom,  $[[\text{or}]]$  a  $-CH_2 COOM$  radical, or an alkyl radical; and

M represents an alkali metal, **optionally sodium**.

20. **(Currently Amended)** The formulation ~~according to~~ of claim 16, wherein the principal surfactant is present in an amount ~~of between 20 and 180 g/l~~ ranging from 20 to 180 g/L.

21-26. (Cancelled)

27. (Currently Amended) The formulation ~~according to~~ of claim 16, wherein the additive ~~is comprises an~~ octylglycoside, an octylpolycycloside, a decylglycoside, a decylpolyglycoside, or a mixture thereof.

28. (Currently Amended) The formulation ~~according to~~ of one claim 16, wherein the additive is present in an amount ~~of between 0 and 150 g/l~~ ranging from 0 to 150 g/L.

29. (Currently Amended) The formulation ~~according to~~ of claim 16, wherein ~~the principal surfactant and the additive have a~~ the proportion by weight of principal surfactant/additive surfactant to additive ranging ranges from 6/1 to 1/2.

30. (Currently Amended) The formulation ~~according to~~ of claim 16, wherein the principal surfactant and the additive ~~represent~~ comprise a total amount ~~of 60 to 180 g/l~~ ranging from 60 to 180 g/L of the formulation.

31. (Currently Amended) An aqueous phytopathological formulation comprising:  
- a hydrosoluble herbicide salt of N-phosphonomethyl glycine with an alkali metal, a secondary or primary amine, a diamine, an alkanolamine, or a sulfonium;  
alkali metals, secondary or primary amines, diamines, alkanolamines, or  
sulphoniums,  
with  
N-phosphonomethyl glycine

- at least one principal surfactant ~~selected from alkylbetaines and alkyl(amidoalkyl)betaines~~ comprising an alkylbetaine; and
- at least one additive ~~being an alkylmonoglycoside or~~ comprising an alkylpolyglycoside.

32. (Canceled)

33. (New) The formulation of claim 16, wherein the amount of additive is less than 10% by weight of the formulation.

34. (New) The formulation of claim 33, wherein the amount of additive is 1% or less by weight of the formulation.

35. (New) The formulation of claim 34, wherein the amount of additive is 0.1% or less by weight of the formulation.

36. (New) The formulation of claim 16, wherein the amount of additive ranges from 0.1% to 10% by weight of the formulation.
